INTRODUCTION

Money Makes the Crypto World Go Round

Welcome back! In the last book, you learned a lot. You learned about money, finance, and cryptocurrency. Quick reminder: cryptocurrency is a digital form of money. It is made using computer code. It is often called a coin or crypto.

When it comes to crypto, there is still a lot to learn. In fact, we have only scratched the surface. By the end of this book, you will know so much more about the crypto world. Keep an eye out for these cool concepts:

- The different types of cryptocurrency
- Crypto exchanges
- How to buy and sell cryptocurrency
- Crypto wallets
- Ways to use cryptocurrency
- Risk management so you can limit your losses and grow your gains

Remember, money makes the crypto world go round. That means we will touch on a few topics related to money and finance. The focus of this book, however, will be on those coins known as cryptocurrency. Get ready to take a deep dive into the crypto world!

FUN FACT

Over the past few years, cryptocurrency has exploded in popularity. In fact in 2021, crypto was used in over 11 million transactions in a single day. If you compare that to the average number of credit card transactions per day in 2021—approximately 110 million—it may seem like cryptocurrency has a long way to go. But crypto is definitely making ripples in the financial world. That's why it's important to learn about buying, selling, and saving cryptocurrency!
